

## **WPT Server software**

### **Installation Manual – Upgrade to latest Version**

#### **Purpose**

This document will guide the installer to upgrade the WPT host application

#### **Host Application Installation**

1. Close the USBReader application (if running)
2. Copy the zip file to the c:\Share folder on the WPT server.
3. Unzip the WPT\_HostApp\_xx.xx.xx\_Upgrade
4. Make sure zip file is completely extracted before executing WPT\_HostUpgrade.bat
5. Wait for the batch file to complete the execution. ( Some error messages are normal, depending on prior version)
6. This completes the upgrade.
7. The installation log file will be created at C:\WPT\WPT\_UpgradeLog.txt
8. Remember to enable and execute Windows Update to get the latest security patches if necessary from \windowsupdate folder.
9. Remember to enable the PGandEListenerService for any Auto-DR customer
10. Remember to enable the BACnetServer for any BACnet-connected customer
11. Reboot the machine for change to take effect.
