

Your buildings are talking
Are you listening?

IntelliCommandSM

February 22, 2017

Eliminating Hidden Waste is Complex

- What building data are you analyzing every day?
- What is it telling you?
- Are you continuously detecting problems before they occur?
- How much are undetected problems costing you?
- How often can you auto correct problems with no field labor?

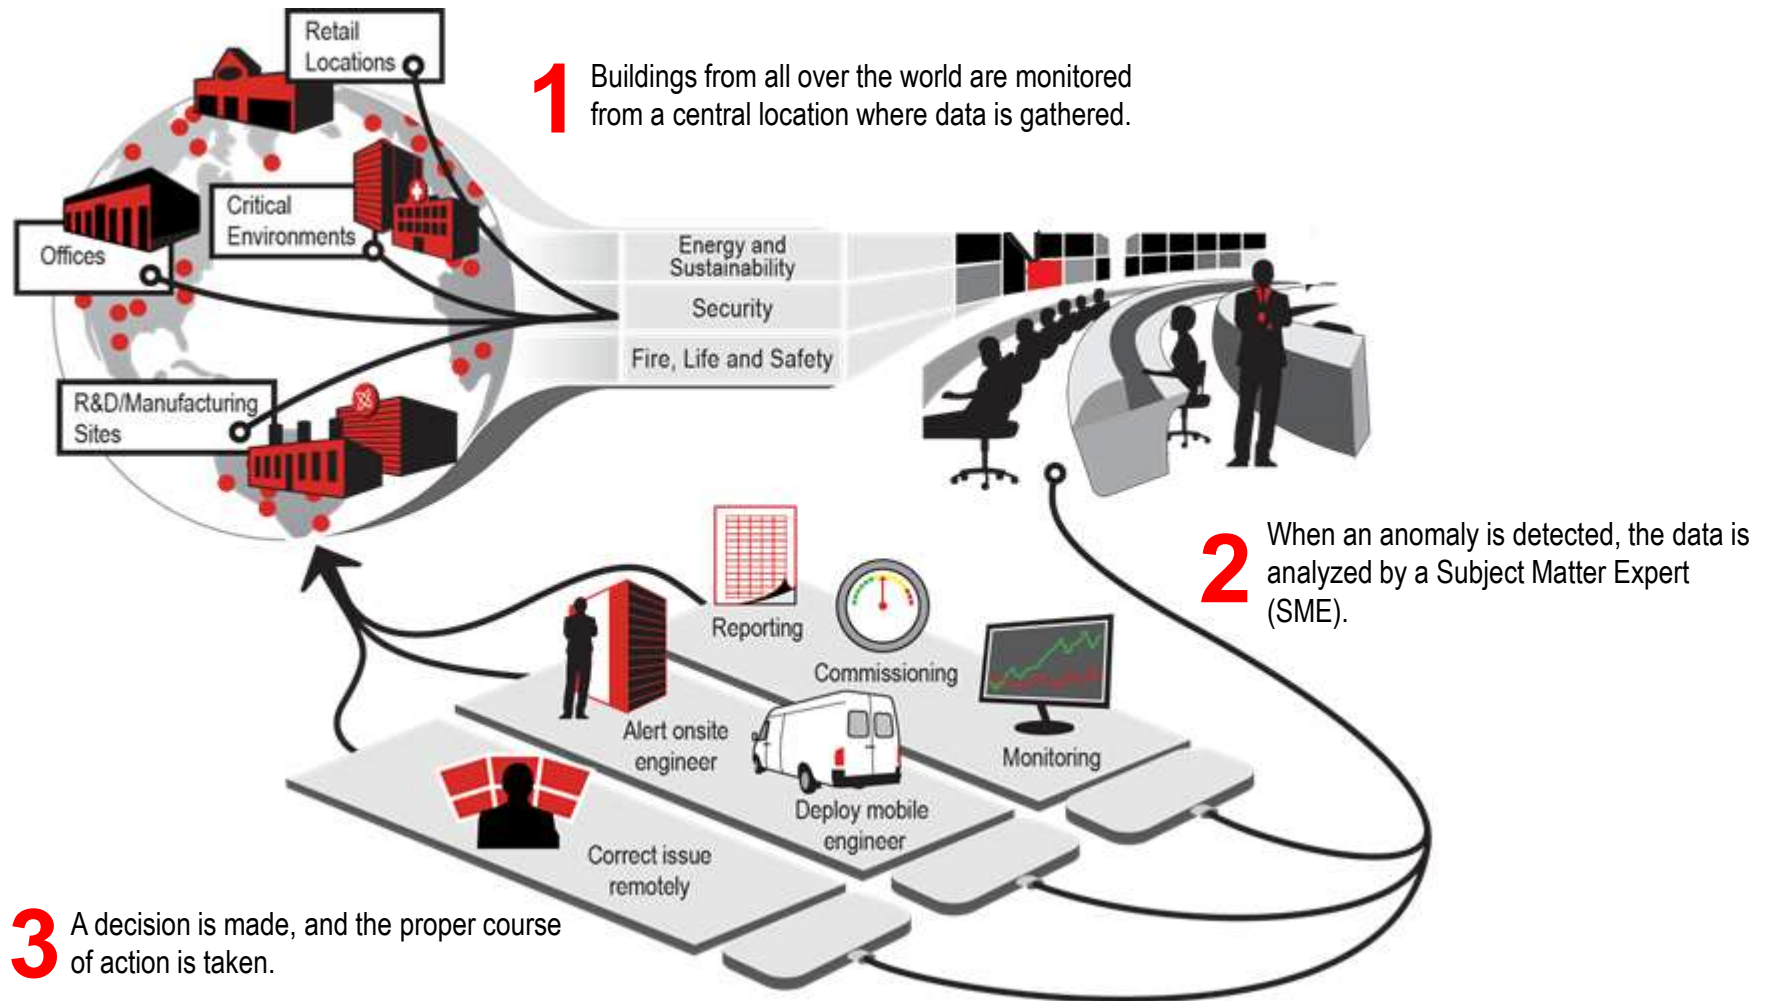

You collect
data
but then
what?

Buildings talk

We analyze

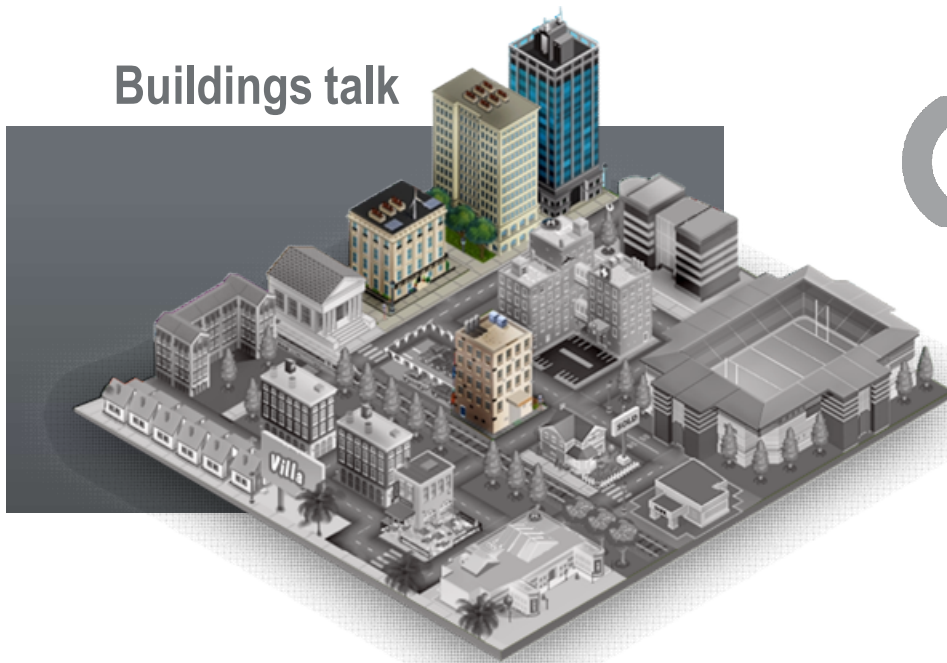

Analysis by Subject
Matter Expert (SME)

Remote BAS Optimization – Greater Commissioning

- Two way communication or 'read-write'
- Optimal control through remote adjustment capability and proactive equipment testing
- **Greatest energy cost reduction**

Buildings talk

We Can Talk Back

“SaaS” with Command Center SMEs

Utilizes subject matter experts and 24/7 staffing to assist FM operations;

Continually optimizes millions of data points across thousands of assets;

Remotely optimizes equipment on a dynamic basis to enhance energy cost saves;

Reduces both reactive work orders and unnecessary engineer call-outs; greater PM is performed for more space and with less risk;

Seamless integration with work order system; dispatches technicians with the proper expertise, tools and repair parts
